NetYCE appoints Michiel Toes as Chief Operating Officer

Amsterdam, February 10th, 2020 — NetYCE, leading provider of enterprise-grade network automation solutions, is pleased to formally announce the appointment of Michiel Toes as the company's Chief Operating Officer. As COO, Michiel will leverage his experience in leading diverse teams in fast-paced industries to guide NetYCE's aggressive growth strategy.

Michiel's responsibilities will include the worldwide operations and development strategies of NetYCE as well as building out the team to exceed customer expectations.

"What sets Michiel apart is his people-first, highly customer-focused mindset and strategic strength," said Wim Gerrits, CEO. "I believe Michiel will drive integration and innovation in our commercial operations and I am thrilled to welcome him to NetYCE."

Toes started his career at Cabletron and served as founder and CEO at SMT. Started from scratch, he was able to grow the company to one of the leading value-added resellers in EMEA for Splunk, Concord and CA.

Michiel: "The dedication and motivation exemplified by the team of high potentials at NetYCE was a natural draw for me. The fact that network automation is now the number one investment area for network departments sealed the deal. I'm excited to be joining the team to lead the company's strategy during the next phase of high growth."

About NetYCE

NetYCE is a leading provider of true enterprise-grade network automation solutions. Its unified framework gives organizations the power to control network changes, enforce policies & rules, automate changes and enforce intent-based standardization and collaboration. As a strategic partner for network service providers and large enterprises, NetYCE takes the *work* out of the network, enabling them to boost their business performance.
